

Alloy Machined Side-Eject Tine - .375MT x 5.000L x .3500D

R106-8941

Details

Manufactured from tubular steel with a precision machined slot in the side wall to allow for more efficient core removal in heavy soils. R&R's unique method of machining maintains the maximum side wall height for strength to avoid bending. Case hardening hardens the inner and outer surfaces of the tine wall to over RC55 for added wear.
