

Underhill H2O Maximizer Liquid - Surfactant / Polymer Resin Blend - 30 Gallon Drum

RGHMAX30

Details

A unique soil surfactant and polymer resin blend that can be tank mixed for spray application or injected directly into irrigation flow. Surfactant ingredients provide initial soil wetting action while polymer resin absorbs to soil particles for enhanced water retention. Reduced watering requirements are achieved through surfactant's reduction of surface tension combined with polymer resin's attachment to soil particles for greater water holding capacity to guard against plant stress. Polymer resin boost water retention in soil to deliver enhanced residual activity. 30 Gal / 114 Liters Drum.

- Enhance water infiltration into repellent soils
- Boost soil water holding capacity for extended residual activity
- Max available water for turf and plants by 25% or more
- Tank mixed or injected directly into irrigation flow
- Use 16 to 24 fl oz (480 to 720 ml) per acre on a monthly basis
- Liquid concentrate
- 30 Gal / 114 Liters Drum

Specifications

Manufacturer	Underhill
Container Size	30 gal
