

Rain Bird XFD On-Surface Dripline - 0.6gpm 18" Spacing 250' Coil

RGXFD-06-18-250

Details

This dripline is made of a unique material that offers significantly greater flexibility for tighter turns with fewer elbows for easier and faster installation. The patent-pending, pressure-compensating inline emitter design provides a consistent flow over the entire lateral length, ensuring higher uniformity for increased reliability in the pressure range of 8.5 to 60 psi. Dual-layer tubing (brown over black or purple over black) provides unmatched resistance to chemicals, UV damage and algae growth to effectively irrigate ground cover, dense plantings, hedge rows and more.

Specifications

Manufacturer	Rain Bird
Length.	250 ft
