

No-Spill Nozzle Assembly

RNS6132

Details

No Spill 6132 push button nozzle assembly is designed to stop flow automatically when the tank reaches full and features an integrated 20 mesh Stainless Steel filter screen to stop dirt and debris. The specially vented nozzle produces a fuel flow rate of almost 3 gallons per minute. The attached dust cover keeps the spout clean. Use with 2010 or newer models with Child Resistant Post. For 2009 and prior models, the 6132 Nozzle Assembly may be used by removing the CR Neck Ring.
