

Snake Bagger Double Bagging System

RP2905

Details

The Snake Bagger provides two 48" bags for safety and the ability to always have a backup bag when one is in use. The lightweight bags, one inner and one outer, are designed with a sleeve on the bottom corner to work with restraining tubes or to step on to create bag tension. Triangular aircraft grade aluminum frame with strong, comfortable handle. Features two safety snap locks on bag frame for quick release. Replacement inner bag available. One of our top sellers! This snake tong is constructed with blue aircraft grade aluminum tubing with interior wall thickness of .055 inch. The ends are cast aluminum.

- Features outer and inner bagging system
- Two safety snap locks on frame
- Blue aircraft grade aluminum tubing with cast aluminum ends
- Strong, comfortable handle
- Replacement inner bag available
