

XL Turf Repairer

RP7429

Details

Remove a 9" (23cm) square of turf and transfer to exchange hole without noticeable repair. The sides incline to the root base to give dense grass right up to the edges of each square. Due to the deep extraction taken, newly laid turf can be used without damage. Each piece is cut exactly square and fits neatly into pre-cut holes. Turf is then replaced without gaps allowing play to resume immediately.

- Remove and transfer 9" square turf
- Quick and easy repair for immediate return to play
