

Root Assassin Shovel

RRA1000

Details

Designed with 20 curved, double-edged serrated teeth on each side of an alligator snout-shaped shovel blade results in a "killer" of a shovel. Cuts roots while digging in and pulling out, dig a posthole, remove a root-bound bush or tree, prune above-ground branches or clear overgrown areas. The strong one-piece blade and ergonomically designed handle are of industrial-grade powder-coated carbon steel with rubber-coated D-Grip handle. Large forward turned step. Sharpenable. 48" Length.

- 20 Double edged sharp serrated teeth on each side
- 16.5" Blade tapers from 6" wide at top to 2" wide at the bottom
- Forward turned step for secure foot placement
- Comfort D-Grip handle for added leverage and control
- Commercial grade steel blade
- Overall length - 48"
- Weight - 4 lbs.
