

Tubeless Tire Repair Kit - 30 Seals

R10030

Details

Permanently repair tubeless tires without messy cement or liquid sealant. The Safety Seal Repair kit will repair nearly 100% of all tubeless tires including radial, non-radial, steel-belted, and non steel-belted without removing the wheel, in many cases. Self-vulcanizing rubber fiber repair material will outlast the tire without leakage or breakage. Ideal for cars, pick-up trucks, trailers, golf carts, ATV's, mowers, wheelbarrows, tractors, and irrigation systems. Includes steel insertion tool, heavy duty spreader probe to determine path of injury through the tire and prepare the injury for repair, lube, instructions and 30 pliable seal "cords" for sealing punctures or irregular cuts from the tread to the inner liner. Easy to use. Save labor and downtime. Carrying Case. Refill kit includes 60 seals.
