

Parallel Controller R258

Details

Now you can quickly check to be sure the roller is parallel to the reel ensuring the best quality of cut. This tool may be used to insure accuracy of units on or off the mower! Simply attach the magnetic bar to the bottom of the cutting unit bed knife then pivot the arms to contact either the front or rear rollers. Ideal for all cutting units from greens mower to fairway.

- Assures accuracy of units on and off the mower
- Quickly check parallel while rollers are still on the mower
- Magnetic bar
- Arms pivot to contact front or rear rollers
- Ideal gauge for all cutting units
